

PLANTER BOX SPECIFICATION

Incorporating plants in your office environment can benefit both your business and your employees by improving air quality, reducing staff stress levels and increasing productivity. These customisable planter boxes aesthetically suit any office and can be paired with our cabinets. The clever rubber grip pad and drip tray allow for functionality, plus the design of the panels add acoustic buffering between working zones. Plants also provide reduction in the levels of dust, bacteria and mould otherwise present in an office environment, while enhancing spatial aesthetics.
