CONSIDERED PIECES FOR THE WORKPLACE

ELEVATE MONITOR ARM

The Framework Elevate Monitor Arm features a special quick-release VESA plate, which can support a 36" monitor weighing up to 11.8kg. The Arm easily adjusts, allowing you to work in a more comfortable, ergonomically correct position. Staring at a computer screen that's not at eye level can cause neck and eye strain, as well as painful back problems. Quality craftsmanship, impressive functionality, and unparalleled design raise the bar for this mount to the highest level.
